# Objectives

Conducting a survey among university teachers allows for the collection of valuable information on various aspects of university life, including:

**Teacher satisfaction with their work environment and employment conditions:** Questions about available resources, professional development opportunities, and support from management.

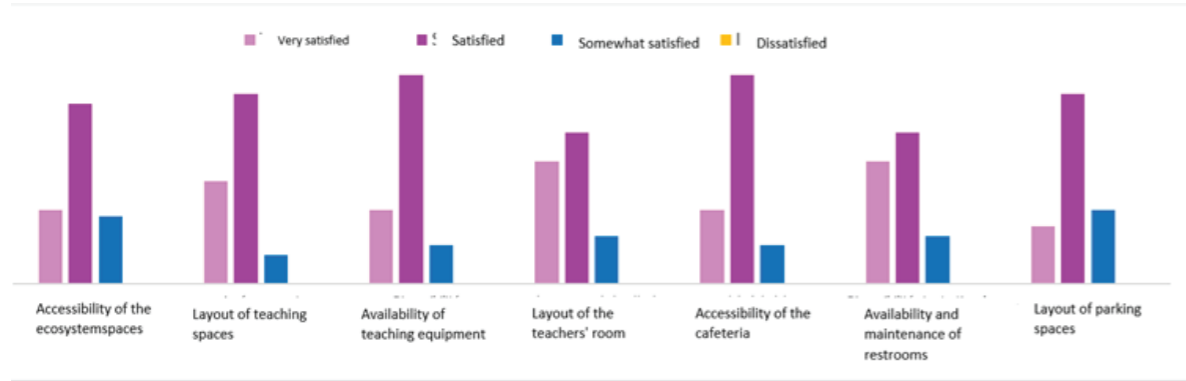

**Teachers' perceptions of the quality of study programs and teaching methods:** Questions about the relevance of curricula, the effectiveness of teaching methods, student evaluation, and pedagogical support.

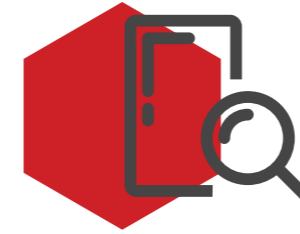

**Teachers' opinions on the challenges and opportunities faced by the university:** Questions on research, communication, and more.

## Infrastructure

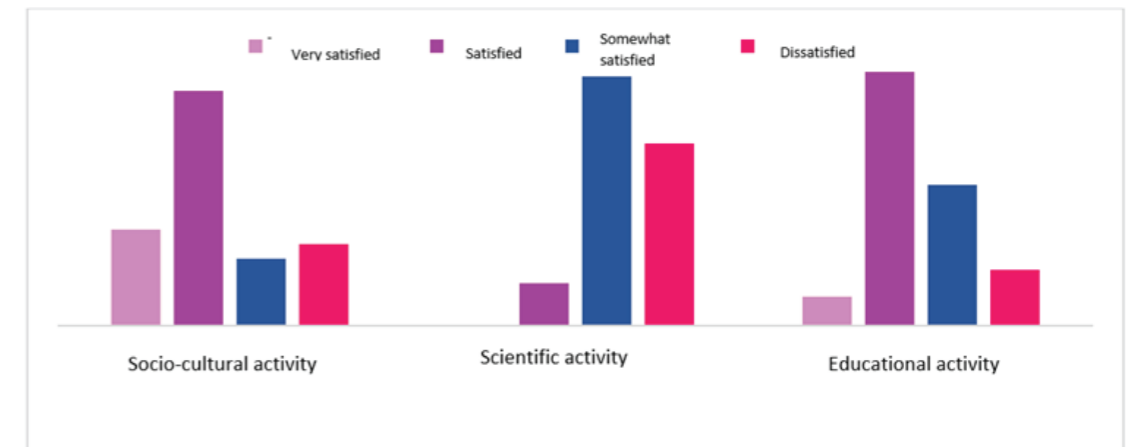

Level of satisfaction with UPES infrastructure and signage

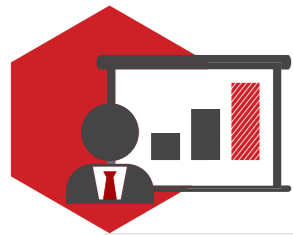

## Scientific Research Activities

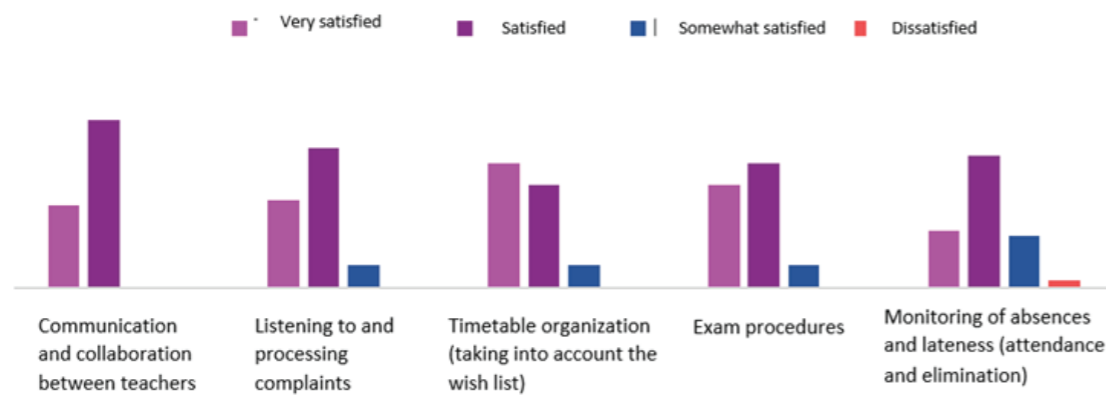

### Activities Organized by UPES

Level of satisfaction with UPES activities

## Course Organization

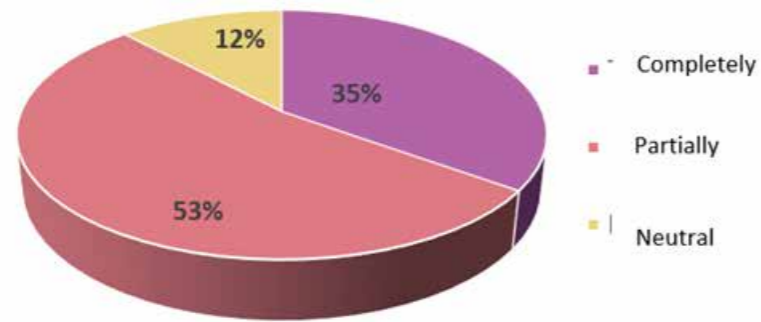

Level of satisfaction with teaching organization

➤ The most appreciated activities among respondents are educational activities, followed by socio-cultural and scientific activities.

➤ It was suggested that research and innovation should be further promoted within the university.

## Integration of Research Results into Modules

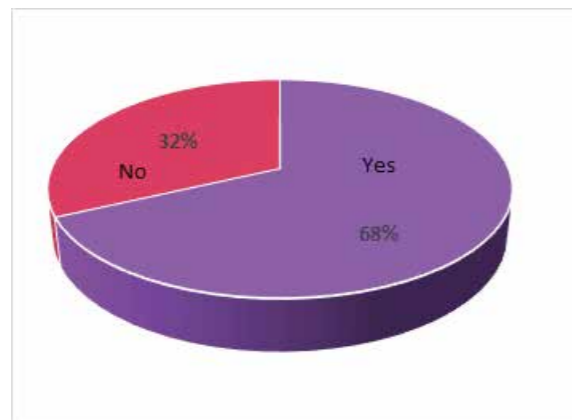

Percentage of Research Integration into Courses

A significant percentage of more than 85% of teachers integrate the results of their research activities and technological advancements into the content of the modules they teach.

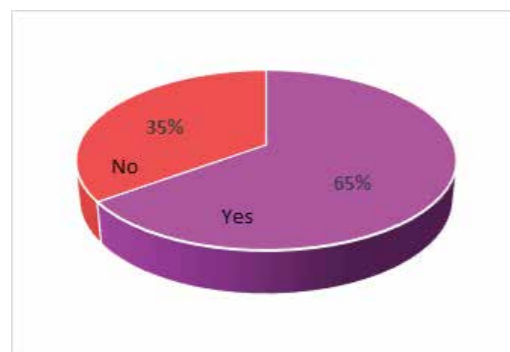

Level of satisfaction with UPES involvement in quality policy

## Motivation for Scientific Research: Research Policy

Raising awareness of UPES research policy

## Motivation for Scientific Research: Participation in Scientific Events

Participation in scientific events

In conclusion, surveys conducted among teachers can be a valuable tool for gathering information about their concerns, perceptions, and suggestions. The results of these surveys can be used to improve the quality of teaching, teacher morale, and the overall functioning of the university.
